Docket No. 2003P-0218/CP1

Dear Dr. Fleischer:

This is in response to your petition filed on May 19, 2003, requesting permission to file an Abbreviated New Drug Application (ANDA) for the following drug products: Glipizide and Metformin Hydrochloride Tablets for Oral Solution, 2.5 mg/250 mg, 2.5 mg/500 mg and 5 mg/500 mg. The listed drug products to which you refer in your petition are Metaglip® (Glipizide and Metformin Hydrochloride) Tablets, 2.5 mg/250 mg, 2.5 mg/500 mg and 5 mg/500 mg approved under NDA 21-460 held by Bristol Myers Squibb. We also reference our letter dated February 3, 2004 and your amendment dated February 4, 2004.

Your request involves a change in dosage form from that of the listed drug products (i.e., from Tablets to Tablets for Oral Suspension). The change you request is the type of change that is authorized under the Federal Food, Drug, and Cosmetic Act (Act).

We have reviewed your petition under Section 505(j) (2) (C) of the Act and have determined that it is approved. This letter represents the Food and Drug Administration's (FDA) determination that an ANDA may be submitted for the above-referenced drug products.

Under Section 505(j) (2) (C) (i) of the Act, the FDA must approve a petition seeking a dosage form that differs from the dosage form of the listed drug product unless it finds that investigations must be conducted to show the safety and effectiveness of the differing dosage form.

The FDA finds that the change in dosage form for the specific proposed drug products does not pose questions of safety or effectiveness because the uses, dose, and route of administration of the proposed drug products are the same as that of the listed drug products. The FDA concludes, therefore, that investigations are not necessary in this instance. In addition, if shown to meet bioavailability requirements, the proposed drug products can be expected to have the same therapeutic effect as the listed reference drug products.

PAV 1

2003P-0218/CP1
The Weinberg Group Inc.
Glipizide and Metformin Hydrochloride Tablets for Oral Solution
2.5mg/250 mg, 2.5 mg/500 mg, and 5 mg/500 mg

In addition, this petition and your waiver request were evaluated with respect to the “Pediatric Research Equity Act of 2003” (PREA). PREA requires that all applications for new active ingredients, new indications, new dosage forms, new dosing regimens, or new routes of administration include an assessment of the safety and effectiveness of the drug for the claimed indication in all relevant pediatric subpopulations unless the requirement is waived or deferred. Your pending ANDA suitability petition is affected by this Act because it is a petition for a change in dosage form. The FDA has determined that your proposed change in dosage form is subject to PREA, but has concluded that investigations are not necessary to demonstrate the safety and effectiveness of your proposed product in the pediatric population.

For your information, the listed drug products to which you refer are covered by a period of exclusivity protection that appears in the Approved Drug Products With Therapeutic Equivalence Evaluations (Orange Book) published by the FDA. The existence of such exclusivity will require a statement upon submission of an ANDA for your proposed drug products and may also affect the approval date of any ANDA.

The approval of this petition to allow an ANDA to be submitted for the above-referenced drug products does not mean that the FDA has determined that an ANDA will be approved for the drug products. The determination of whether an ANDA will be approved is not made until the ANDA itself is submitted and reviewed by the FDA.

To permit review of your ANDA submission, you must submit all information required under Sections 505(j) (2) (A) and (B) of the Act. To be approved, the drug products will, among other things, be required to meet current bioavailability requirements under Section 505(j) (2) (A) (iv) of the Act. We suggest that you submit your protocol for these drug products to the Office of Generic Drugs, Division of Bioequivalence prior to the submission of your ANDA. During the review of your application, the FDA may require the submission of additional information.

The listed drug products to which you refer in your ANDA must be the drug products upon which you based this petition. In addition, you should refer in your ANDA to the appropriate petition docket number cited above, and include a copy of this letter in the ANDA submission. Please note that once an application is approved for a product that is the same as the subject of an approved petition that drug product will be the listed drug. Thereafter, a petition may not be utilized as the basis for submission of an ANDA.
